Course Description

FRIDAY, NOVEMBER 22, 2019- MARRIOTT SYRACUSE DOWNTOWN

The Single Tooth Implant: The Ultimate Esthetic Challenge *(morning)*

The single tooth implant may be one of the most difficult challenges dentists face, with possible unforeseen outcomes.

The past few years have brought a paradigm shift, as guidelines for the surgical and restorative approach have changed dramatically. Fine tune your workup to create a result that is as close to a natural replacement as possible. We will focus on the latest advances incorporating evidence-based data. Participants will review a unique sequential treatment planning approach which can result in successful outcomes. Emphasis will be given to the use of 3D treatment planning as it relates to the diagnostic workup and the use of computer guided surgery. * Multiple provisional options and/or interim Hawley prosthesis appliances will be reviewed to attain ideal esthetic results. Long term follow-up will be shown as it relates to these approaches.

- Explore the use of platform switching and when and where to use it
- Identify the "Top 10" rules for a successful esthetic outcome
- Determine when to use immediate vs. delayed placement of implants
- Understand the principles of CT guided treatment planning
- Describe multiple provisional options for maximizing esthetic results

To Pull Or Not to Pull: Periapical Surgery vs Implant Surgery *(afternoon)*

What alternative treatment options should be considered when a restorative and/or endodontic failure occurs?

Advancements in delivering periapical surgery have resulted in success rates that can be equivalent to implant replacement when certain guidelines are adhered to. Periapical surgery as an adjunct to endodontic treatment is a proven approach. With the introduction of new surgical techniques and a systematic method to the diagnosis and treatment of compromised teeth, the clinician should be able to more accurately determine the long-term prognosis for these treatment options. Evaluate treatment options with an evidence-based approach when a tooth is ailing or failing. This course will describe the indications and contraindications for performing or referring a patient for apical surgery. With a specific 7 step workup, including a correct history, radiographic and clinical evaluation, the decision to perform an apicoectomy will be weighed against further evaluation, a retreatment option, or extraction and replacement with an implant (immediate or delayed). As a result, a decision is more accurately made as to whether an implant or a fixed bridge (fixed partial prosthesis), a removable prosthesis (fixed or transitional temporary prosthesis), or other options would be the final treatment plan discussed with the patient.

- Learn the radiographic technique to use when evaluating a tooth for a fracture
- List the 7-step work-up: procedures and tests that should be used when performing or referring a patient for an apicoectomy
- Understand principles of guided tissue regeneration, and know the indications and contraindications for its use
- Recognize how the location of a sinus tract can be a key critical diagnostic indicator for the final prognosis
- Identify the signs to differentiate between an Endo/Perio vs. Perio/Endo lesions and understand the difference as it relates to the final prognosis

About the Speaker

FRIDAY, NOVEMBER 22, 2019 - 9:00 AM - 4:00 PM

Daniel G. Pompa, DDS

Dr. Daniel Pompa is an Oral and Maxillofacial Surgeon. He is a Fellow in both the American Association of Oral and Maxillofacial Surgeons and the International Congress of Oral Implantologists. He has been a guest speaker at Columbia University College of Dental Medicine and New York University College of Dentistry. Dan is now a guest speaker at the University of Florida College of Dentistry, New York University College of Dentistry, Boston University Henry M. Goldman School of Dental Medicine, University of Maryland School of Dentistry, University of Pittsburgh School of Dental Medicine and will soon be presenting at Midwestern University College of Dental Medicine-Arizona and the University of Tennessee College of Dental Medicine.

Dr. Pompa is an author with four courses on-line and has published in journals such as: The Journal of the American Dental Association, Dentistry Today and the New York State Journal of the Academy of General Dentistry. He has been featured as a Seminar Series Speaker/Consultant for the American Dental Association. Dr. Pompa is now a Colgate Speaker and has a course "Medical Emergencies in the Dental Practice" on the Colgate Website. In the December 2017 issue of Dentistry Today, Dr. Pompa was cited as a "Leader in Continuing Education for 2018". He has presented over 500 lectures both Nationally and Internationally.

Dr. Pompa has no financial relationships relevant to this presentation to disclose.

Partial support for this activity provided by Colgate.

The Fifth District Dental Society designates this activity for 7 Continuing Education Credits.

The Fifth District Dental Society is an ADA CERP recognized provider approved by the New York State Dental Association.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

2019 Continuing Education Dates

Feb 8 - Winter Seminar - Marriott Syracuse Downtown

May 3 - Spring Seminar - Hampton by Hilton Cazenovia

Sep 12 & 13 - CNYDC - ONCENTER - Syracuse

Nov 22 - Fall Seminar - Marriott Syracuse Downtown
