For a complete calendar of continuing education or to register online please visit the Fifth District on the web at www.5dds.org or call 315-434-9161.

“Like” the Fifth District Dental Society of the State of New York on Facebook.
The Digital Implant Workflow and Full Arch Solutions for Everyday Dental Practice

In the Morning:
Implants have become a mainstay of the dental practice over the past several years. The success rate affords us many options when it comes to replacing missing teeth. This course will help the dental team realize the many possibilities of implant dentistry, and see how digital dentistry is being used to improve patient care. We will analyze in depth the digital workflow, including scanners and treatment planning digitally. We will talk about the single implant restorations and multiple implants, including abutment selection and cement or screw retained restorations. We will also discuss the role of the entire team in this process. By the end of the course, the dentist should feel confident that he or she can treatment plan and restore implants better. The dentist and team will also realize the rewards of completing such cases. This course is designed for all members of the dental team looking to expand their knowledge and confidence with restoring dental implant restorations.

In the Afternoon:
As most of us have heard by now, the full arch implant supported prostheses have really taken off. As a private practitioner and restorative dentist, it was difficult to decipher what all of the hype was about. We have all had patients wanting implants in a day because they saw it on a commercial. What does that really mean? We will take a look at providing full arch solutions to our patients from the eyes of a restorative dentist and a laboratory.

Learning Objectives:
• We will look at the timeline of implant usage in dentistry, and discuss the success rate over time.
• What is the role of digital dentistry in implant dentistry, and does it make sense for my practice?
• We will discuss the role of the dentist, the laboratory, and the surgeon to achieve greater success. This “Pyramid of Dental Implant Success” is vital in modern dentistry.
• We will not only look at failures in implant dentistry, but we will look at common failures that have led us to rethink our restorative process.
• Individual dental implant - what factors must we look at for success?
• We will leave confident in our treatment planning options for single units and multiple units.
• We will also leave confident on restorative options for dental implants.

Chad C. Duplantis, DDS
Dr. Duplantis received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1999. He continued with postdoctorate training at Baylor College of Dentistry, earning a certificate in Advanced Education in General Dentistry in 2000. He has also applied for, and been confirmed for his Fellowship degree from the Academy of General Dentistry this coming July. He has been in private practice since 2000 in the North Fort Worth, Texas area. In private practice, he treats all ages with an emphasis on restorative and aesthetic dentistry. Dr. Duplantis is a member of Catapult Educations Speakers Bureau and has been a member of several Aesthetic and Restorative Continuums, most recently the Spear Education Study Club. Dr. Duplantis has always had an interest in “high-tech” dentistry and has been incorporating CAD/CAM technology in his practice since 2004. Formerly a CEREC user, he is now a user of the 3M TrueDefinition Oral Scanner and the Glidewell Laboratories TS150 mill. Dr. Duplantis has also written several articles regarding digital dentistry for various dental publications. He has helped 3M on various projects regarding the scanner, and is also a member of the panel of experts on the website TrueDefDoctors.com. He is also a clinical consultant for Glidewell Laboratories. Dr. Duplantis resides in Keller, Texas with his wife, Ellen, and his children, Austin and Ava. He is an avid cyclist, enjoys shooting sporting clays, and loves to be outdoors.

Dr. Duplantis has financial affiliations with 3M and Straumann.
